

DO YOUR BIT, RECYCLE IT!

ONLY 10% OF BATTERIES ARE RECYCLED IN AUSTRALIA

**IF WE DON'T CHANGE OUR HABITS, BY 2036 OUR YEARLY BATTERY WASTE
WILL WEIGH ABOUT THE SAME AS PARLIAMENT HOUSE!**

Over time, batteries in landfill leak chemicals that are toxic to the environment.

By recycling batteries we can reclaim rare earth minerals such as cadmium, lithium, nickel, silver oxide and zinc.

Unrecycled batteries in our landfill can cause fires that burn underground for years!

YOU CAN HELP!

**COLLECT YOUR USED BATTERIES FROM HOME,
DROP THEM INTO YOUR SCHOOL RECYCLING BUCKETS
AND WIN UP TO \$2,000 FOR YOUR SCHOOL!**

THE MORE BATTERIES YOU RECYCLE, THE MORE YOUR SCHOOL WINS WITH...

BATTERY RECYCLING TIPS

- Ensure used batteries have both terminals covered with sticky tape.
- Store in a plastic or glass container in a cool, dry place.
