

Welcome **Student Battery Ambassador!**

What does it mean to be a Student Battery Ambassador?

As a battery ambassador you will be leading the charge so that your school can become the top battery recyclers in the country – and WIN big rewards!

How do I do that?

Remind your classmates to find all those used batteries at home and bring them in to class. You could tell your classmates and teachers, families and friends, or even do an announcement at your school assembly.

Encourage all your classmates to **DO YOUR BIT, RECYCLE IT!**

What happens if our classroom bucket is full?

Organise a regular time to empty your classroom buckets into the large wheely bin (or just whenever the buckets are full). You can use this time to see which class has recycled the most and share any hot tips for collecting batteries.

What else can I do?

Get your classroom teacher or school administrator to take a picture of you with your buckets. This will show what you have saved from landfill.

At the end of each semester, submit your **Battery Ambassadors In Action** via photo or video, and one classroom per school will receive an end of semester **pizza party!**

Don't forget to empty all your batteries into your school's large recycling bin at the front office.

Good luck friends. Love your electrifying work!
