

SAVE THE PLANET! ONE BATTERY AT A TIME

EVERY YEAR, AUSTRALIANS BUY ENOUGH BATTERIES TO CIRCLE THE EARTH 23 TIMES!
MORE THAN 90% OF USED BATTERIES END UP IN LANDFILL
INSTEAD OF BEING RECYCLED.

BY RECYCLING BATTERIES WE CAN RECLAIM RARE EARTH MINERALS SUCH AS CADMIUM, LITHIUM, NICKEL, SILVER OXIDE AND ZINC.

BATTERIES THROWN IN OUR LANDFILL CAN CAUSE FIRES THAT BURN UNDERGROUND FOR YEARS!

OVER TIME, BATTERIES IN LANDFILL LEAK TOXIC CHEMICALS IN TO THE ENVIRONMENT.

YOU CAN HELP!

COLLECT YOUR USED BATTERIES FROM HOME,
DROP THEM INTO YOUR SCHOOL **RECYCLING BUCKETS**
AND WIN UP TO **\$800** FOR YOUR SCHOOL!
THE MORE BATTERIES YOU RECYCLE, THE MORE YOUR SCHOOL WINS WITH...

BATTERY RECYCLING SAFETY TIPS

- ENSURE USED BATTERIES HAVE BOTH TERMINALS COVERED WITH STICKY TAPE.
- STORE IN A PLASTIC OR GLASS CONTAINER IN A COOL, DRY PLACE.
